SUMMARY

Full-stack Software Engineer with expertise in JavaScript, React, Vue.js, Spring Boot, and AWS. Passionate about building scalable applications, optimizing performance, and writing clean, maintainable code. Experienced in API development, database optimization, and cloud services. Thrive in collaborative remote environments and enjoy mentoring developers.

SKILLS

Programming Languages: JavaScript, Java, Ruby

Front-End: React.js, Vue.js, Redux, Vuetify, Tailwind CSS, HTML5, CSS3

Back-End: Spring Boot, Ruby on Rails, Node.js

Databases: MySQL, PostgreSQL, Elasticsearch

DevOps & Tools: AWS, Docker, Git, GitHub, Webpack, Postman

Soft Skills: Remote Work, Code Reviews

EXPERIENCE

Front-End Developer | Novel Aquatech (Mar 2025 – Present, Remote, Freelance)

- Enhanced and maintained a client portal for device management, reports, and settings, contributing new features, bug fixes, and rigorous testing.
- Built a complete admin portal from scratch, enabling administrators to manage users, devices, and configurations efficiently.
- Collaborated closely with the team to ensure smooth UI/UX, improve performance, and deliver production-ready features under tight deadlines.

Full-Stack Developer | Kwanzoo (Oct 2022 – Feb 2025, Remote)

- Revamped the Kwanzoo dashboard with a modern UI, migrating legacy code to a new front-end architecture using React.
- Optimized API performance by integrating Elasticsearch snapshots, significantly improving query response times.
- Developed and deployed new features and resolved critical issues impacting 20+ B2B enterprise clients.
- Led end-to-end implementation across development, testing, and deployment phases, utilizing AWS services for production delivery..

Technical Support Engineer | MICROVERSE (Jan 2022 – Mar 2024, Remote, Part-Time)

- Reviewed 300+ full-stack projects from junior developers, ensuring alignment with technical requirements and industry standards.
- Provided detailed code quality improvements, performance optimizations, and best practices across front-end and back-end components.
- Provided mentorship and technical support to developers in debugging, refactoring, and writing clean, scalable, and maintainable codebases.

PERSONAL PROJECTS

Book Appointments (Full-Stack Web App) – Ruby, Rails, React, Redux, JavaScript, HTML5, CSS3.

- Developed a doctor appointment booking platform featuring user authentication and role-based access control.
- Built RESTful APIs in Ruby on Rails and a responsive front-end with React & Redux. [GitHub](#)

Trendify (Front-End Web App) – React, JavaScript, TypeScript, HTML5, Tailwind CSS.

- Developed a React-based e-commerce app with intuitive UI and seamless checkout.
- Optimized performance using lazy loading and efficient component rendering. [GitHub](#)

EDUCATION

Kalinga University

Bachelor of Technology in Computer Science (July 2019 – June 2022)

- Developed a BloodBank management application as a capstone project using JavaScript, Java, and MySQL.
- Built expertise in software development, database management, and system architecture.

MICROVERSE

Remote Full-Stack Web Development Program (Oct 2021 – May 2022)

- Completed 1,300+ hours of hands-on coding, mastering React, Redux, JavaScript, and Ruby on Rails.
- Built and deployed real-world projects in a remote, collaborative environment following GitHub workflows and Agile methodologies

Teerthanker Mahaveer University

Diploma in Computer Science (July 2016 – June 2019)

- Completed a Java-based CMS software project during a 3-month university internship.
- Studied core computer science fundamentals, including algorithms, data structures, and software development principles.
